Especially when it comes to Waste Management, with the Spent Pot Lining (SPL) Treatment Plant in full operational swing to produce HiCal," added Shaikh Dajj, during the opening of the Spent Pot Lining Treatment Plant in early December 2021.

Built over 26,000 square meters with an annual capacity to treat 30,000 to 35,000 tonnes of SPL, Alba's SPL Treatment Plant is the first-of-its-kind in the Region. Alba has relied on the Australian-based Regain

as the technology provider for this facility. Now that SPL Treatment Plant is in operations, Alba will ensure to fully destruct the hazardous waste present in SPL, generated from smelting operations, following which the final product could be used in the construction and cement industries.

Adding further, Shaikh Dajj said, "This Project represents a tangible and a real progress, not only in addressing our commitment as well as stakeholders'

News in brief

◆ Former Malaysian prime minister Mahathir Mohamad, 96, successfully underwent an "elective medical procedure" and is expected to be discharged in a few days, the National Heart Institute said yesterday. The procedure was uneventful and went as planned," the institute said in a statement. Mahathir was admitted into the institute on Friday, the second time in as many months that he has been hospitalised. Mahathir, who has a history of heart problems, was admitted on Dec. 16 before being discharged a week later.
